WORK EXPERIENCE

Accounting & CRM *May 2010 - Current* Backstop Solutions Group, Chicago
Enterprise Java development on BSGs main Accounting/CRM platform, as well as original development on scalable services to sync email from Exchange 2007/2010 servers. Following an Agile (Scrum) development model with a two week development iteration. Technologies used include Thrift and Hibernate. Testing tools include FitNesse, JUnit and Squish.

Statistics & Tournament Scheduling *August 2009 - May 2010* N. Illinois Hockey League, Chicago
A dynamic user, schedule and statistics management system written in Python using Django, SQLite and PostgreSQL. My personal contributions included the game scheduling algorithm and the statistics page filtering.

OPEN SOURCE CONTRIBUTIONS

Machine Learning & Data Mining *2010* Mahout, Apache
Designed and implemented a decision tree learning and classifying tool that runs on top of Hadoop. The concept was inspired by the Google PLANET paper on distributed decision trees. Mahout is a machine learning framework written in Java.
